

Name: Fit In NFT - eth

Logo: puzzle piecing the word Fit In

Picture: Puzzle picture with number in collection

Eg. V1 1000 pieces numbered 531

V1 1k supply

V2 5k supply

V3 1k supply

V1- sold out then distribute \$

Website: Mint button for v1, v2, v3

Website to be

Can show contract button for people to verify contract

Pie chart of \$ allocation on website for v1

- 80% distributed to v1 winners
- 10% distributed to v2 smart contract
- 10% dev

V2- sold out then distribute \$

illustration of \$ allocation on website for v2

- 80% distributed to v2 winners + 10% from v1
- 10% distributed to v3 winners
- 10% dev

V3- sold out then distribute \$

illustration of allocation on website for v3

- 80% distributed to v3 winners + 10% from v2
- 20% dev

Qns: How do I allocate money from the smart contract to give out to winners?

V2 will be airdropped to v1 holders

If wallet has multiple v1, airdrop the equivalent amount of v2

V3 needs to have both V1 and V2 in wallet to mint
